

SECTION 1 – Page 1 of 1

QUALITY ENVIRONMENTAL POLICY

Our Top Management define this QUALITY ENVIRONMENTAL POLICY, which is realised through statements and procedures referenced throughout our Policy Manual.

The policy ensures that the documentation is appropriate to the nature, scale and environmental impacts of its activities, products and services, and also includes a staff understanding of meeting both the requirements of ISO 9001

It is our policy to manage our business in the most environmentally responsible manner, complying with the relevant environmental legislation and regulations; and aiming to provide our clients with an on time, fault free, reliable service.

CSEBM recognises that the nature of our business has potential to impact detrimentally on the environment, particularly where we use cleaning materials and in handling waste disposal.

We are committed to continuous improvement and the prevention of pollution. Through regular reviews we ensure that our waste carriers are registered and legally compliant, we avoid the use of hazardous materials and products and seek substitutions where feasible, we strive to reduce the waste used through re use and recycling.

We ensure that our staff and sub contractors are communicated to, trained and subsequently well informed about the environmental issues that may affect their work.

The management system provides a framework for the setting and reviewing of objectives and targets, to help support our continuous improvement and ensure our system is developed.

This Policy will be published and placed on internal noticeboards, distributed to staff during their induction training and through discussions and placed on the company website. A full review will be held every six months within the Management Review Meetings.

Ben Lewis
Managing Director
